

ENVIRONMENTAL POLICY STATEMENT

PEOPLE/PLANET/PARTNERSHIP

Date of issue: 1 Dec 2023

Our vision, which is to be the standard for excellence in specialist construction projects, manifests itself as a sustainable and resilient culture. This shapes our day-to-day activities in being a safe and great place to work whilst taking care of the environment and always striving to provide better solutions to the industry.

Space recognises that, as a business, its activities impact the environment. This impact could affect nature both directly and indirectly, through the actions we take and the services we provide.

It is our aim to ensure that the impact we make is a positive and beneficial one for current and future generations, therefore our environmental policies are established to manage health, environmental safety, and quality. These are reviewed annually and updated to reflect changes to legislation, emerging good practices, and business needs.

Space business and operational practices meet the requirements of ISO 14001. We regularly assess the risks and potential impacts to assign the necessary measures to minimise the potential damage. These measures comply with appropriate, specific, and measurable objectives.

As a business, we are committed to protecting the environment through:

- continually improving environmental performance across all our operations through the implementation of ISO14001 and our Sustainability Plan, focusing on reducing our footprint, reusing and recycling, and contributing towards becoming a net zero organisation to combatting climate change
- ensuring compliance with legislation, regulations, standards, permits, Licence and Authorisation conditions, and where appropriate exceed our legal obligations

Excellence As Standard

Space Interior Systems Ltd, 5 Mercury House, Calleva Park, Aldermaston, Reading, RG7 8PN

- building and maintaining long-term client and supply chain relationships by providing innovative, energy-efficient solutions that empower a sustainable future and support communities
- promoting a Culture of Care across the business, facilitating high levels of safety and performance for all.
- taking a proactive approach towards the well-being of our employees, by considering all four pillars of well-being; physical, emotional, social, and financial.
- involve staff with the aim of improving our environmental, health and safety performance

Promoting these commitments will ensure high quality, efficient mission delivery in order to maximise our environmental, safety and health performance.

Expires: 1 December 2024
