

SPACE SUSTAINABILITY STRATEGY 2024

The Sustainable Development Goals are a set of 17 universal global goals, adopted by all UN Member States in September 2015 as part of the 2030 Agenda for Sustainable Development, a 15-year plan to protect the planet and improve the lives and prospects of everyone, everywhere.

Space Sustainability Strategy is determined by the following goals:

Social

We never compromise Health and Safety in the workplace. Our effective safety processes are backed up by ongoing training and development, and our careful recruitment process ensures all new employees are quickly brought up to speed with our attention to detail. Space always ensures all employees are treated and valued equally, and we actively promote fairness, inclusion and respect. This creates an environment where the open communication of ideas and issues is encouraged. With this approach, we are able to invest in tomorrow's leaders today.

Excellence As Standard

Environmental

Space aspires to go beyond merely minimising harm to the environment to working with our customers and supply chain to provide environmental enhancement and sustainable solutions.

Space implements and maintains an environmental management systems which complies with the requirements of ISO 14001:2015 in order to define, measure and control processes and activities that are employed in the execution of the business.

We continually improve the environmental performance of all our activities by proactively developing solutions to minimise environmental impact during the delivery and life-cycle of contracts.

Economic

Our business principles are based on being customer focused, offering innovative services and employing a highly experienced team. We approach the complex, large-scale problems of our clients with the principle of sustainability. It determines the way we make decisions regarding the materials, logistics and processes we use.

Our supply chain is equally important. We collaborate with high quality and committed suppliers to provide a sustainable return for our stakeholders and achieve national and global sustainable goals.

Date of issue: 1 December 2023

Expires: 1 December 2024
